

Connect your Smartphone to SPG series via Bluetooth for shooting or using App

Identify current Bluetooth mode

Staring on the indicator while power on the gimbal.

Indicator	Mode
 → 	HID Mode
 → 	App Connect Mode

► HID Mode ◀ HID = Human Interface Device

- (1) Turn on the bluetooth of your iPhone.
- (2) Choose the Bluetooth name as "product model_xx" (e.g. "FY_SPGPlus_xx"), then pair with it,

When you change your iPhone, please first shutdown Bluetooth of the previous one, then start Bluetooth pairing for the new one.

Once paired, you can use the Bluetooth shutter button to control the smartphone for shooting photo or video.

- Tips: (1) Make sure the volume "+" key of your smartphone can control the shooting.
(2) Android devices: Android 4.3 and above, the hardware of smartphone support bluetooth 4.0 / BLE protocol .

► App Connect Mode ◀

- (1) Download the app and install it.
- (2) Start the app on your smartphone, follow the instructions to connect the smartphone with gimbal via Bluetooth.

Once connected, you can use app to control or configure the gimbal.

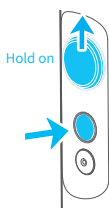

Switch the working mode of bluetooth

The gimbal will store the Bluetooth working mode of last time used, you can power off the gimbal and switch the Bluetooth working mode with following instructions:

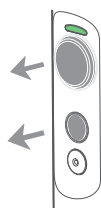

Step 1

Turn the joystick up and hold on.

Step 2

Pressing function button.

Step 3

Release them when the Indicator turns to green light.
